

# MOBILE WORKSHOP CONTAINER

**WORKSHOP OR STORAGE SPACE  
WHEREVER YOU NEED**

# MOBILE WORKSHOP CONTAINER

We will deliver a specially equipped workshop space directly to the location you indicate. Our Mobile Workshop Container has been designed with the efficiency of your business in mind. Containing all the essential tools and equipment, this portable workshop is ready to conduct a range of operations – from simple repairs to complex service tasks. We will provide the appropriate conditions so that you can focus on your key tasks, rather than searching for solutions in emergency situations.

## Our container can serve as:

- 🔧 a mobile workshop for crimping hydraulic and industrial hoses,
- 🔧 a mobile workshop for bending and processing hydraulic hoses,
- 🔧 a mobile version of a goods warehouse in the form of a consignment stock,
- 🔧 or another option in agreement with Tubes International.

## YOU DECIDE HOW TO USE IT!

### What are the benefits?

- COST REDUCTION**  
Thanks to direct access to tools on-site, you no longer have to bear the costs of transporting damaged parts to a stationary workshop.
- TIME SAVINGS**  
You will avoid unnecessary scheduling of workshop visits and waiting times. With our mobile workshop, work stoppages become a thing of the past, and your efficiency increases.
- WIDE RANGE OF SERVICES**  
From storage space to simple repairs and complex maintenance work – our Mobile Workshop Container is at your disposal for a broad spectrum of services.

## Features of our Mobile Workshop Container:

- ⚙️ **The dimensions (6m length, 2.4m width, 2.5m height)** allow for easy transport using a standard hydraulic crane truck (HDS) and placement of the container in any location.
- ⚙️ **The large volume (33m<sup>3</sup>), surface area (11 Euro pallets), and payload capacity (28235kg)** allow for the storage of numerous tools, machinery, and other materials.
- ⚙️ **Full electrification** enables convenient use of electrical devices and air conditioning.
- ⚙️ **Specialized fume and dust extraction** ensures work in compliance with all health and safety regulations.
- ⚙️ **The spacious interior of the container** provides a comfortable working environment.
- ⚙️ **Numerous cabinets and shelves** facilitate workspace organization.

# BEST <sup>®</sup> **in** place

Our Mobile Workshop Container is not only exceptionally functional and equipped with everything you need for effective work, but it is also extremely flexible in terms of location. Thanks to our **TUBES BEST <sup>®</sup> **in** place** service, we deliver the container directly to the location specified by the client.

## We will deliver it wherever needed, whether it is:

- a production hall,
  - a construction site,
  - an oil rig,
  - other location.
- 

## We provide the highest standard of service and flexibility at every step

We are a business partner that not only delivers top-quality services but also adapts to your unique needs and expectations. Our company, keeping in mind your convenience and work efficiency, focuses on complete professionalism and flexibility. Our Mobile Workshop Container is a space that combines the latest technological solutions, a personalized approach, and reliability, making it an ideal solution for your company.

### FULL PROFESSIONALISM

Upon request, we provide the service of the Mobile Workshop Container with our qualified and experienced staff that will guarantee you full support in accordance with the highest standards prevailing in the industry. You can also staff our container with your own crew, whom we will be happy to train. We will adapt to your individual needs and preferences.

### UNLIMITED FLEXIBILITY

We value your time, so we'll adjust our working hours to meet your needs. The container is equipped with an air conditioner with a heating function, allowing the workshop to be used regardless of weather conditions.

### UTILITY

We focus on functionality and ease of use. The container is easy to use and maintain, and its space allows for versatile applications.

### SAFETY

The health and safety of workers are our top priorities. The container has been designed to ensure safe working conditions, even in the most demanding applications.

## Types of tasks that can be carried out in the container:

- crimping industrial and hydraulic hoses,
- cutting hoses and hydraulic pipes,
- cleaning hoses and hydraulic pipes,
- bending hydraulic pipes,
- pressure testing of hoses.

## Example equipment Standard workshop tools, plus:

- hydraulic press with a complete set of dices for crimping up to 2" hydraulic hoses,
- sleeves and fittings for hose fabrication,
- hose cleaning equipment,
- hose cutting saw,
- manual pipe bender,
- pipe cutting saw,
- hose rack.

## Do you want to submit any special requirements?

No problem. We will equip the container with devices and tools tailored to your specific needs!
