

A large yellow mining truck is shown in a quarry, carrying a load of grey rocks. In the background, there is a steep, rocky hillside and another piece of yellow mining equipment. The scene is set under a cloudy sky. A semi-transparent red rectangle is overlaid on the lower half of the image, containing the main title.

High pressure hydraulics

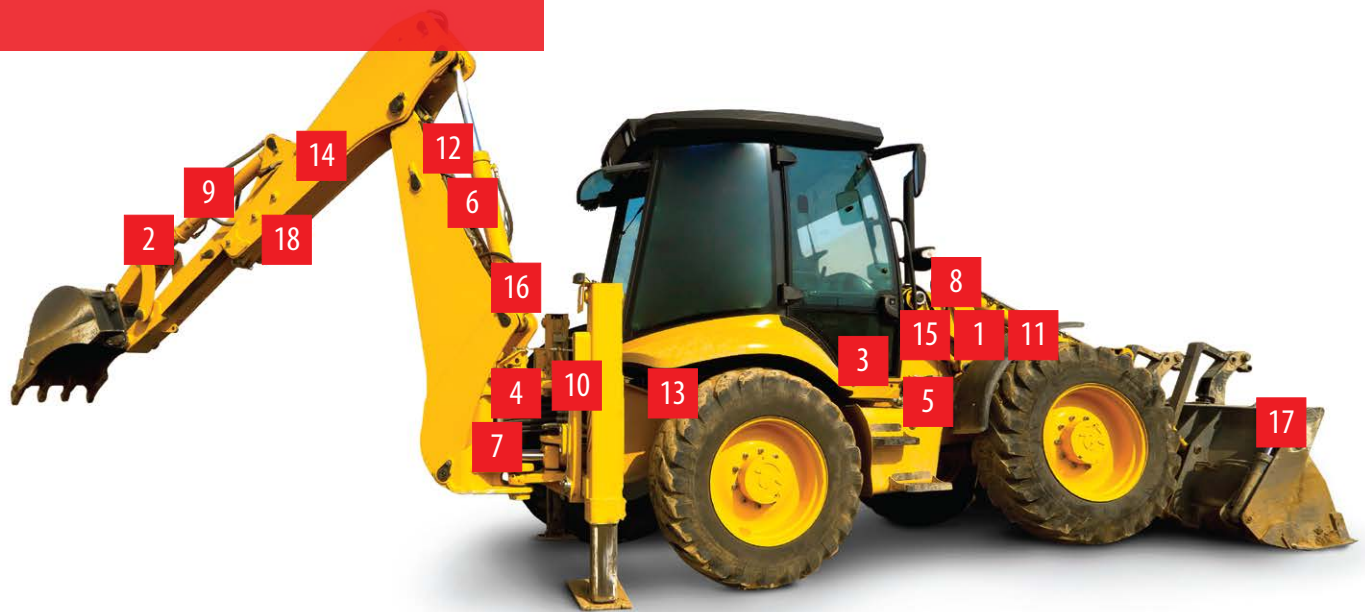

in construction machinery and vehicles

Since 1993, when it was established, **Tubes International** provides industrial hoses and couplings, high pressure hose assemblies and high pressure elements to all industry sectors.

Our accumulated knowledge and experience have made us experts in the business. Today we offer the highest quality products, expertise advice on their selection but also professional services.

Over the years we have built our reputation for superior standards in **production and service of high pressure hydraulic hose assemblies**. Working in close cooperation with world's leading manufacturers we provide state-of-the-art solutions to all applications.

High pressure hydraulics in construction machinery

High pressure hydraulics in special vehicles

1 Gear pumps

2 Lubrication technique

3 Multi-sectional directional control valves

4 Rubber and thermoplastic hydraulic hose assemblies

5 Measuring systems

6 Pipe and hose mounting clamps

7 Hose fittings

8 Ball valves

9 Covers and protectors

10 Control valves

11 Hydraulic pump connectors

12 Seamless precision pipes

13 Valves for plate mounting

14 Hydraulic quick release couplings

15 Suction hoses for pumps

16 Hydraulic adapters and connectors

17 Hydraulic cylinders

18 Hydraulic pipe assemblies

Production of hydraulic and high pressure hose assemblies

We produce high pressure hydraulic hose assemblies of all kinds – starting from standard hydraulic rubber hoses, thermoplastic hoses, PTFE hoses, all the way to highly specialised, ultra-high pressure hoses (up to 3200 bar). We easily handle serial production but also customised items matching specific requirements. Additional services concerning hydraulic hose assemblies such as special marking, further tests, cleaning or individual packaging can be always provided on Customer request.

We are available 24 hours a day

Today, we provide 24 h service in selected branches across Poland. It concerns **crimping high pressure hydraulic hose assemblies** in particular.

We can provide our services on the spot or in the workshop in your nearest Tubes International branch.

**service
24h**

Other services

Our company offers many different services, some of which are listed below:

- Production of industrial hose assemblies
- Production of steel hose assemblies
- Production of fittings according to Customer's specifications
- Professional hydraulic pipe bending
- Hydraulic hose assembly and pipe cleaning
- Service of machines and equipment for industrial hose assembly production

We supply all industries

A broad range of products and expertise knowledge of our employees allows for industrial hoses and couplings supplied by Tubes International to be used across many industry sectors in a variety of applications.
